4. AA Teletext

In AA Teletext screen, users can click to see “Double Broker Queues”, “Teletext with Charts” & “Teletext with Futures”.

4.1 Double Teletext

- (a) Clicking the “Broker Queue” button will display two detailed stock quotes with broker queues simultaneously.

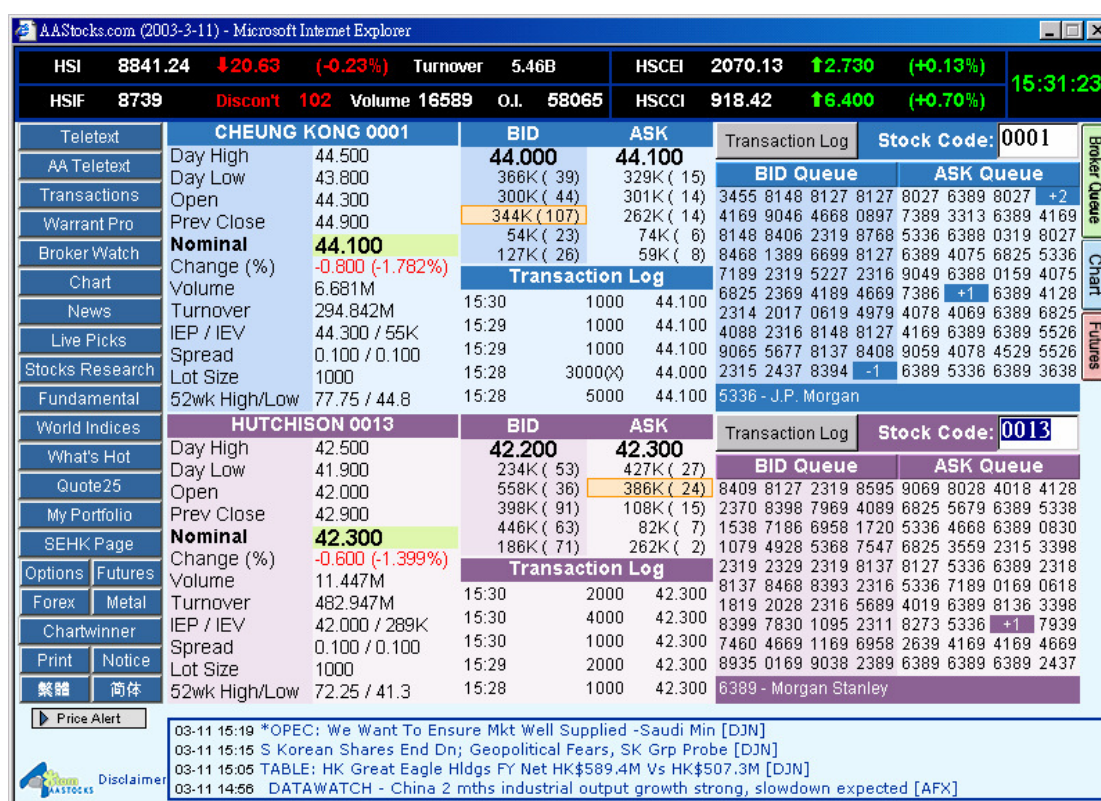

Figure 4.1.1. Double Teletext Screen to check two stocks simultaneously

- (b) Users can enter the stock code number with a “plus” (for example: 2+) in the “Stock Code” box and press “Enter” key to view a stock quote in the other section. The stock quote with broker queue of the corresponding stock code will display on the lower section of the screen.
- (c) Or users can directly type in the stock code in the text box in the lower section and press “Enter” to view the stock quote.

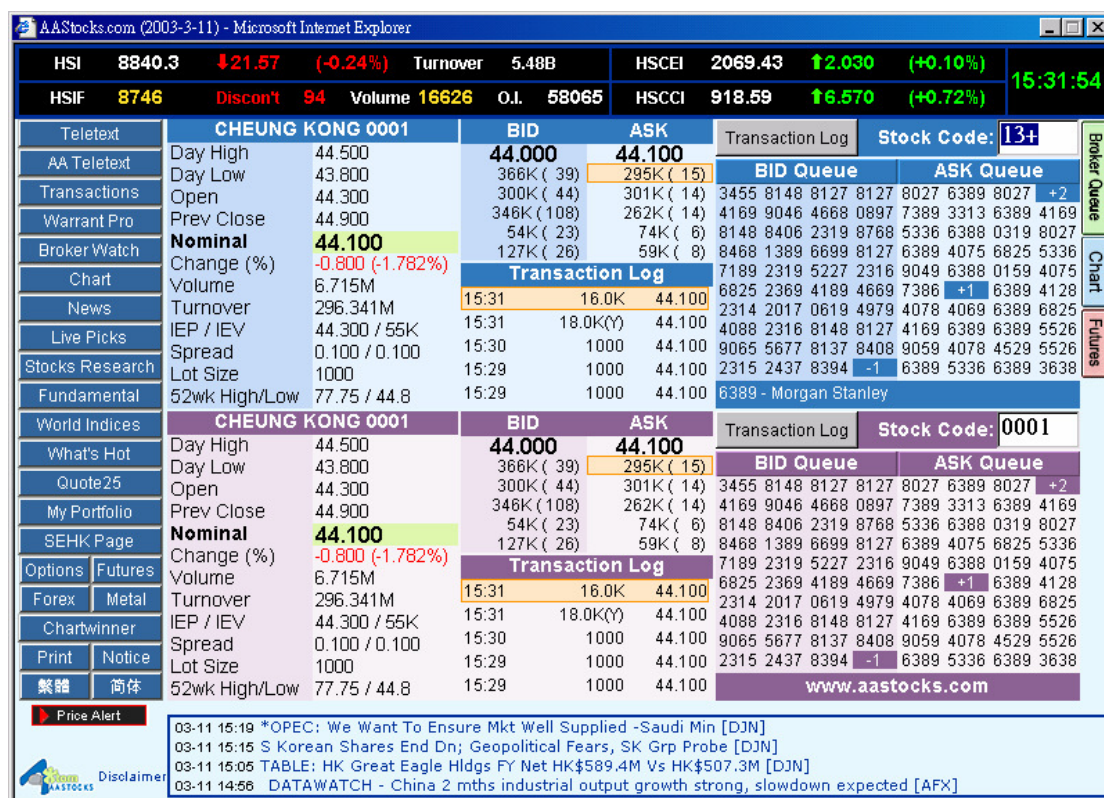

Figure 4.1.2. Type in a stock code with a plus to display it in the other part of the Teletext screen

4.2 Teletext with Charts

- (a) Clicking the “Chart” button will display the real-time snapshot intra day chart of a stock and HSI & HSIF.

Figure 4.2.1. Teletext Screen with the Intra day charts of the stock, HSI and HSIF

4.3 Teletext with Futures

- (a) Clicking the “Futures” button will display the Hang Seng Index Futures quotes and Market quote of Futures & Options directly fed from Hong Kong Futures Exchange.

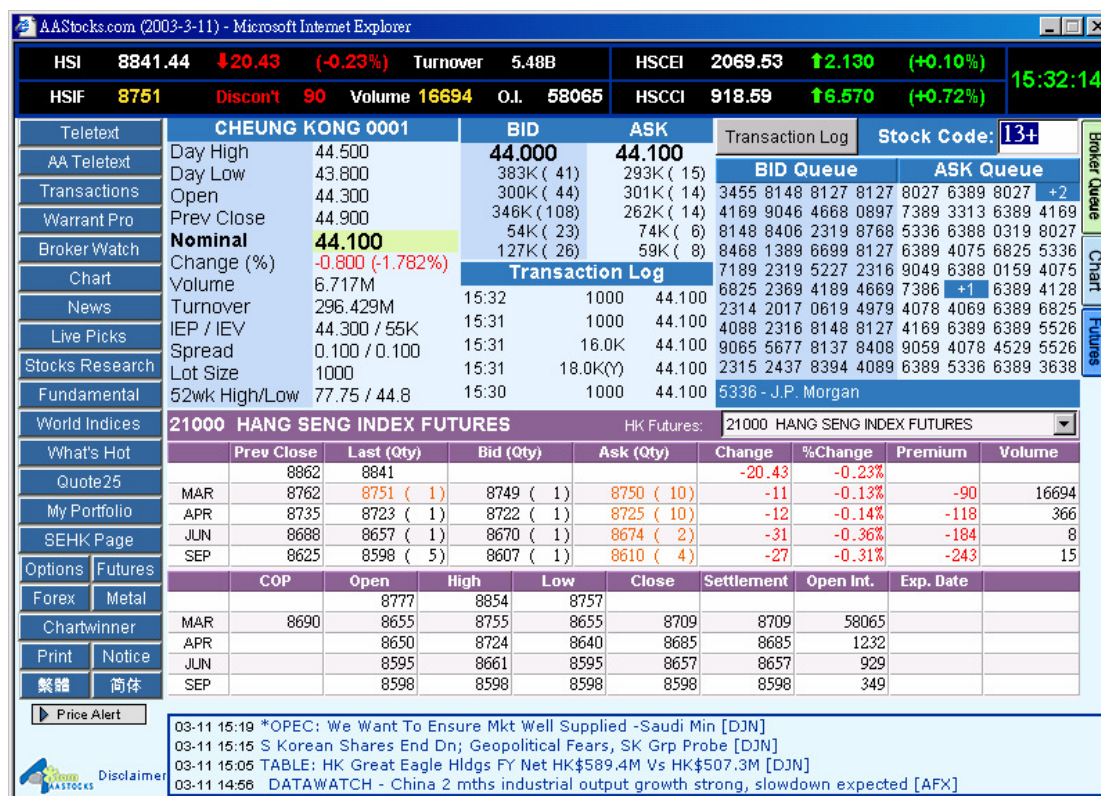

Figure 4.3.1. Track a Teletext screen of a stock with Price Information on Futures all together

5. Transaction Summary

5.1 Clicking the “Transaction Summary” button will show you the price-volume distribution diagram with all transaction logs in a trading day.

Figure 5.1.1 Transaction Summary to view price volume distribution diagram

6. Warrants Watch (also labelled as “Warrant Pro”)

- Clicking the “Warrants Watch” button to view the real-time streaming data of all warrants of an underlying stock. Warrants Watch offers you real-time warrants analysis and charting tools at your finger tips.
- Users can sort the warrants by clicking on the name of each column, select and filter some warrants out before doing in-depth research of the selected ones.
- You can filter the warrants by checking on the tick box besides the stock code or click the “filter” button at the top to add or remove warrants in display.
- To access the charting tools of a specific warrant, simply click on the stock code and a pop up window with the charts will appear.

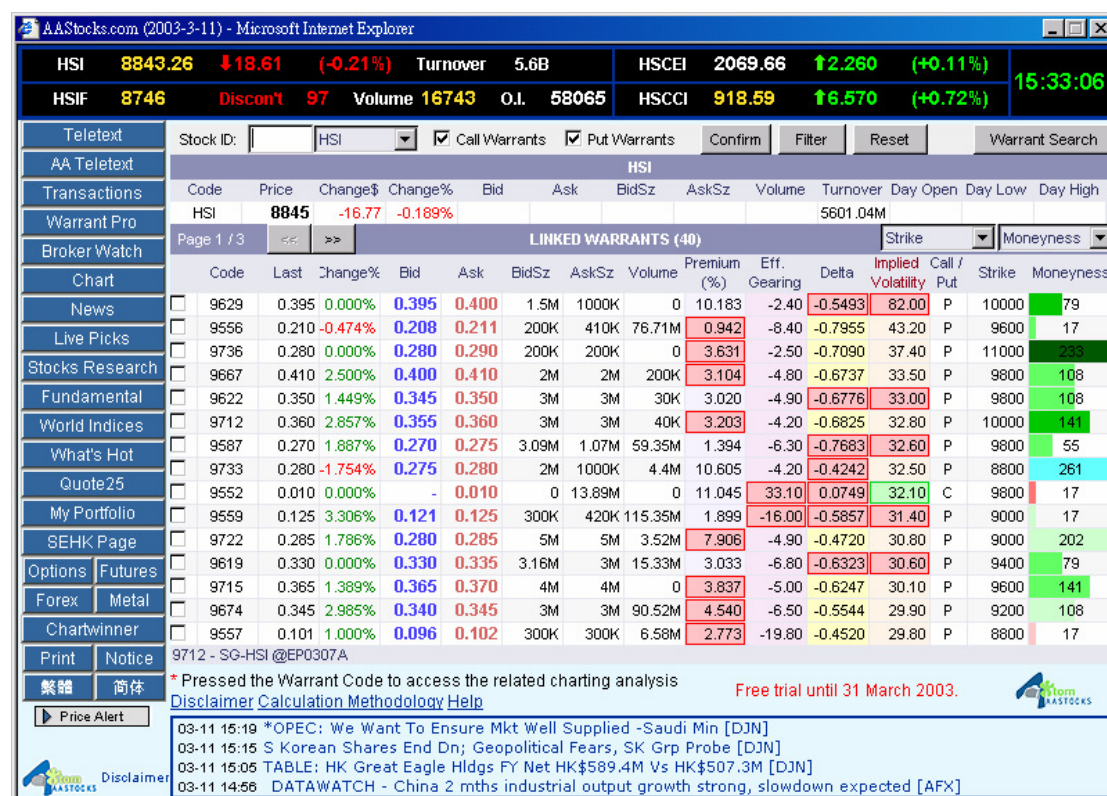

Figure 6.1.1 Real-time streaming warrants data of an underlying stock

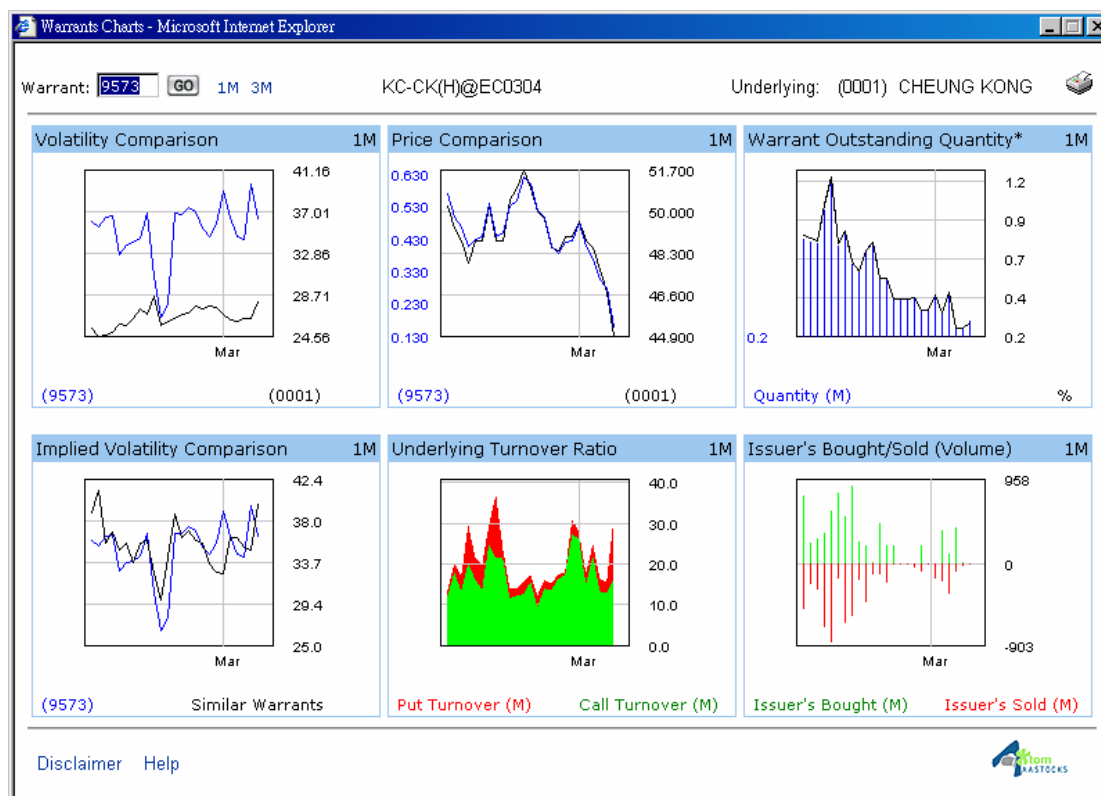

Figure 6.1.2 Linked charts of a selected warrant

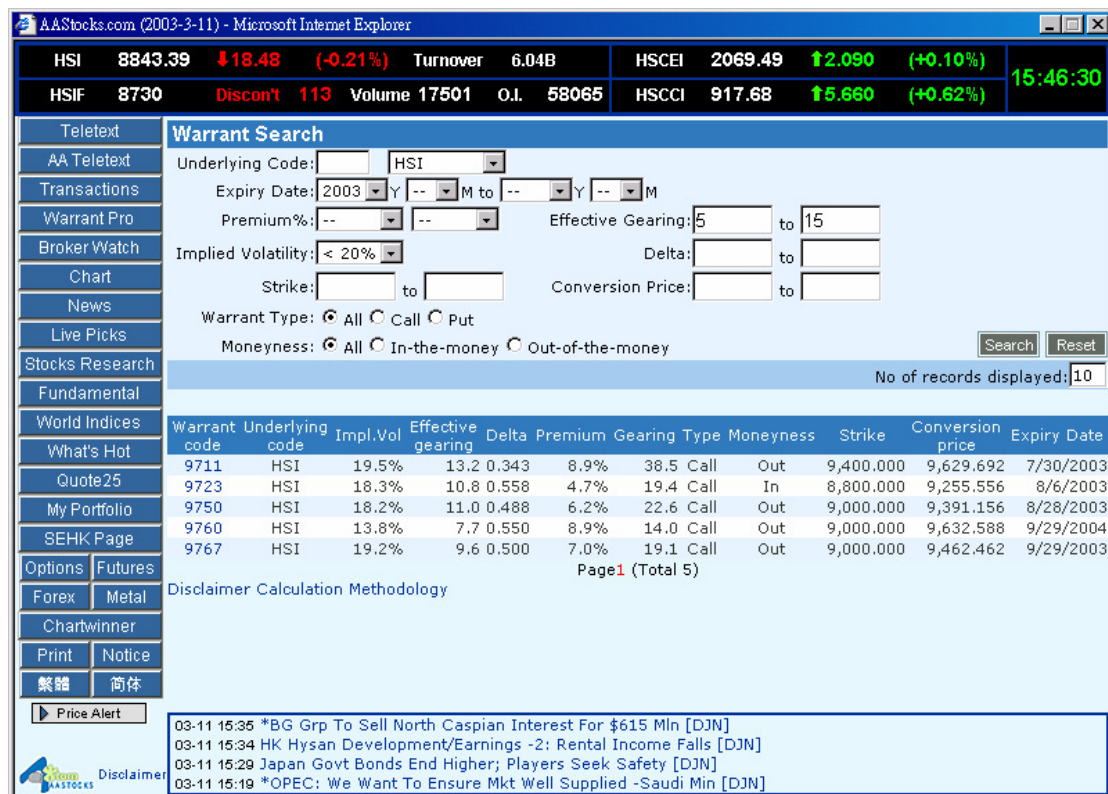

Figure 6.1.3 Real-time scanning tool for warrants

7. Broker Watch

Clicking the “Broker Watch” button will allow you to view all stocks that are currently queued on a specific broker's bid and ask queues. It shows all the buying and selling orders of the broker listed in the broker queues. You can see stock codes, bid/ask price levels and number of orders.

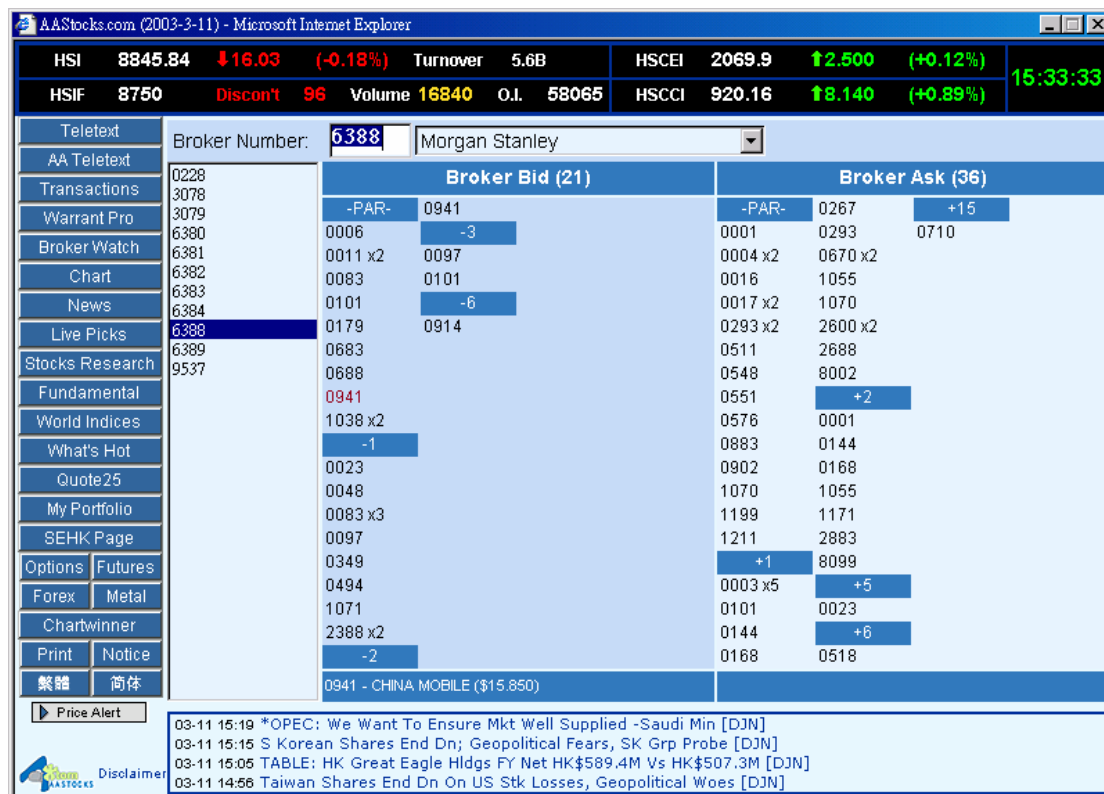

Figure 7.0.1 Broker Watch displays the buying/selling a specific broker currently

7.1 Functions in the Broker Watch

(a) **Broker Number:** Text box

Users can enter the broker number in the “Broker Number” box and press “Enter” key to view the bid & ask queues listed by the specific broker number currently.

The bid & ask queues of the corresponding broker number will display on the lower section of the screen.

(b)  Button

Pulling down the Broker Name menu and clicking on a specific broker name can show the bid & ask queues listed by the specific broker currently.

(c)  Button

Clicking on a specific broker number under a specific broker name can show the bid & ask queues listed under a specific broker number currently.

(d) In the bid/ask queue, e.g. “-1” indicates that the broker submits an order at one spread below the best bid price to buy the share in the queue. “x 2” means that the broker has inserted 2 orders at the same price level in the bid/ask queue. You can mouse over the stock code to see its short name and the order price.

8. Chart

(a) Clicking the “Chart” button will display the stock chart that shows you historical performance of the stock prices.

(b) It allows to display chart in Line, Bar, Candle Stick chart types. It creates charts from 1-min, 5-min, 10-min, 15-min, 30-min, hourly, daily and weekly in time intervals. It also provides technical studies of Moving Averages, RSI, MACD, STC and William R%.

(c) Moving your mouse over the chart to show day high, day low, close price and volume of the stock on a particular time period at the bottom of the chart.

Figure 8.0.1 Sample Screen of Java Chart

8.1 Functions in the stock chart

(a) On the top of the Chart, a menu bar is there to list the icons to customize the chart as you want.

(b) Description of the menu bar:

	<p>Zoom-in: to magnify the recent data on the chart. You can simply expand the graph into a larger scale by clicking on the “Zoom in” icon again and again.</p> <p>After expanding the graph, you can use the roll-over bar at the bottom right corner to move the graph backward and forward.</p> <p>You can also drag and drop on the graph to highlight a selected period of time to zoom in.</p>
	<p>Zoom-out/Restore: to restore the graph into a smaller scale. You can restore the graph into a smaller scale by clicking on the “Zoom out” icon again and again.</p>
	<p>Scrolling over Effect: toggle it on to display the Day Open, Day High, Day Low, Day Close, the value of the selected technical analysis tools in the pop up message box as below</p> <div data-bbox="336 1081 767 1406">  </div>
	<p>Show Pointer: to toggle on/off the pointer to study the chart more easily</p>
	<p>Add horizontal line: click on the chart to add a horizontal line at a specific price level.</p>
	<p>Add Straight Line: Move the cursor and click on the point where you want to start and drag to the other point to end the line. When the “Add Line” function is toggled on (The straight line of the icon is shadowed when this function is activated.), you can simply drag and drop on the graph to add the straight line again and again.</p>
	<p>Add a parallel line: Draw a straight line first and click on the “Add Parallel Line” icon to toggle it on. Right click the added line to pop up a parallel line. Then, right click the parallel line to drag and drop it to a specified location.</p>
	<p>Delete the last updated line or the selected line</p>
	<p>Delete all drawn lines</p>

(a) Summarize the characteristics and potential performance of a stock in real-time. The commentary describes the recent behaviour of a stock, and outlines its possible movements in near future.

Figure 11.2.1. Sample Screen of Live Stock Comment generated by proprietary Artificial Intelligence model

11.3 6-month Target

(a) Estimate the valuation of a stock based on its fundamentals & financials, also compare its performance with prevailing market index, Hang Seng Index.

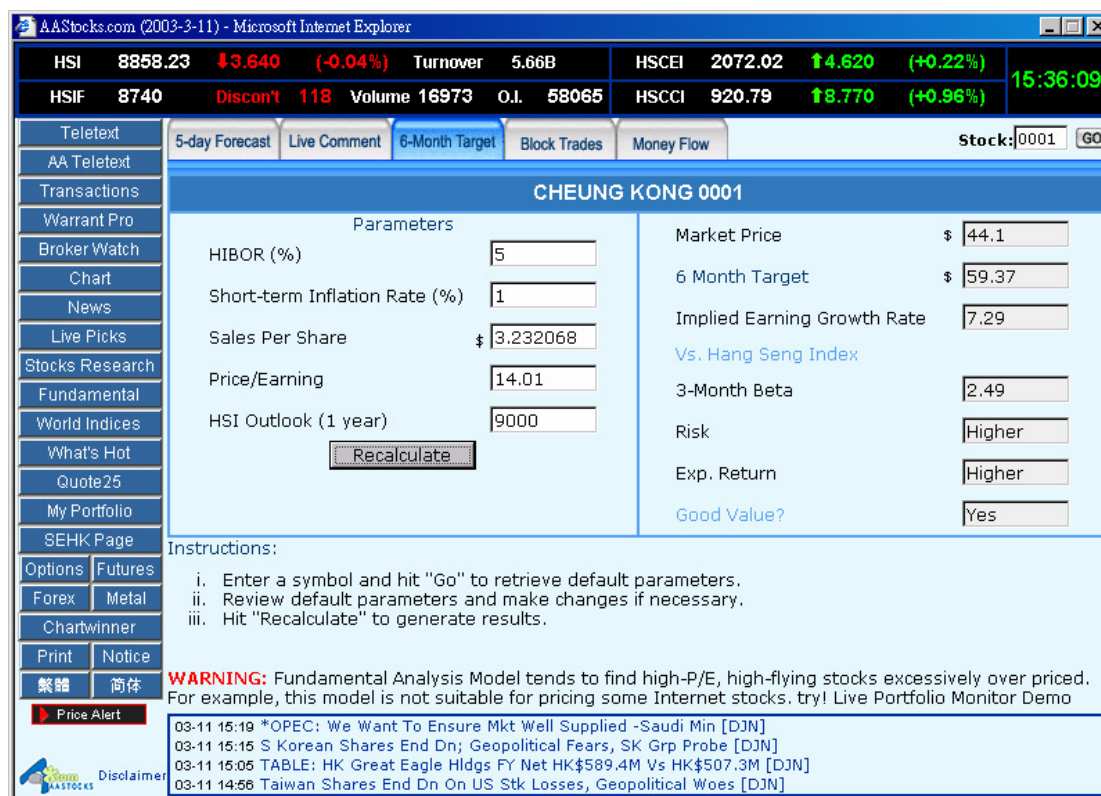

Figure 11.3.1 Sample Screen of 6-month Price Target based on a proprietary fundamental pricing model

11.4 Block Trades

(a) To tell whether institutions and large investors are bullish or bearish on a stock. Block Trade contains information about total block trades, the block trades over market price, the block trades under market price, and a list of all block trades transactions.

(b) Volume, Total Amount or both will be bolded to indicate that the transaction is qualified as a block trade by achieving an amount of turnover or number of shares exceeding five hundred thousand. Users can sort the transactions by clicking on the name of each column.

Figure 11.4.1 List the block trades to tell the bullish/bearish sentiment in the market

11.5 VWAP/Money Flow

11.5.1 VWAP (Volume-weighted Average Price)

(a) VWAP chart shows the average price (In addition to the price, it also takes consideration of the volume of the trade to calculate the average price.) for a stock in the current or previous market session. VWAP is a performance benchmark for investors to tell you buy the stock at a good price.

11.5.2 Money Flow

(a) Money Flow shows how much money is moving in or out of a particular stock in a chart. It is a powerful indicator of the strength of a price rally or sell-out.

(b) Money is moving in if the line of Money Flow moving above zero while money is moving out if the line of Money Flow moving below zero.

Figure 11.5.2 Money Flow and VWAP

12. Fundamentals

12.1 Company Fundamentals

- (a) It contains Company Profile, Corporate Information, Dividend, Balance Sheet, Earnings, Profit/Loss, Financial Ratio, Linked Warrants, Basic Market Data, Latest Results, as well as insightful information of Cash Flow Statements, Dividend History, Capital Raised and Share Buybacks for each particular stock.
- (b) Clicking on the folder head to view Market Data, Company Profile or Corporate Information.
- (c) For more fundamental data, selecting the item by pulling down the menu and clicking on the item name.

The screenshot shows the AAStocks.com website interface. At the top, there's a navigation bar with tabs for Market Data, Company Profile, and Corp. Info. The 'Company Profile' tab is selected. Below the navigation bar, the company name 'Cheung Kong (Hldgs) 0001' is displayed. The main content area is divided into two columns. The left column lists various financial metrics: Chairman (LI Ka Shing), Issued Capital (2,316M Shares), Par Value (HKD) (0.500), Market Capitalisation (HKD) (103,996M), and Corporate Profile. The right column contains a detailed corporate profile text. At the bottom, there's a news section with several headlines.

Corporate Profile

The Cheung Kong Group is a multi-national conglomerate giant based in HK, with a geographically well-diversified business portfolio spanning 36 countries worldwide. During the FYE 12/2001, the Group's net profit was trimmed down by 62.5% to only HK\$7,291mn (as compared with HK\$19,436mn in the previous year). The decrease in net profit for the year was mainly attributed to the reduction in turnover, the provision for property projects in Tung Chung and Hung Hom, and the substantial reduction of share of results of the Group's principal associate, Hutchison Whampoa Ltd. ("HWL").

During the FY2001, property development continued to be the core business of the Group. Currently, the Group has a sufficient land bank that can support its property development in the next 4-5 years. For the Group's investment properties portfolio, these properties primarily include residential properties, Grade-A office towers, shopping arcades and hotels in HK and Mainland China, which provide a large recurrent rental income to the Group. While for the Group's major associate, HWL, it remained the major revenue and profit contributor to the Group for the FYE 2001. HWL, having interests in Cheung Kong Infrastructure ("CKI") and Hongkong Electric, owns a

Figure 15.1.1 Track up to 25 stocks in the Watch List to trace the ups and downs of the market

16. My Portfolio

16.1 Portfolio

(a) Portfolio provides a summary of individual stock trades and users can also edit or create new single portfolio. More than one portfolio can be created to manage different kind of stocks in different portfolios.

(b) It keeps track of the performance of the HK stocks in your portfolio. By entering the price and volume of each stock you purchased, it calculates the current market value and the total profit or loss. In addition, risk management tools of beta and VAR (value at risk) are available to evaluate risk with profit.

Figure 16.1.1 Build up your own portfolio and track its profits and the balance of all portfolios at a single glance

Keys:

L = long position (Buy)

S = short position (Sell)

Shares = number of shares traded

Symbol = stock code of the stock traded

Entry = entry price of the trade

Last = Last/nominal price of the stock

Today's change = Price change in comparison with the previous day close

Capital = Last price x shares

P&L = bid price x shares (when it's a long position)

P&L = ask price x shares (when it's a short position)

P&L = last price x shares (when it's no bid/ask price provided during the non-trading hours)

16.2 Portfolio Watch

(a) Portfolio Watch is a pop-up window featuring with real-time streaming portfolio data and charts derived from "My Portfolio". You can keep monitor of your portfolio when navigating through other market information.

(b) Click on the row to view the chart and company news of a specific stock, (as the highlighted stock in the portfolio below)

Figure 16.2.1 Real-time streaming portfolio along with latest news and charts related to the stocks in your portfolios

16.3 Price Alert

(a) Price Alert provides various parameter settings to keep track of the market movements from Bid/Ask to the upper/lower limit of the price, helping to meet your personal preferences.

[illegible]

Figure 16.3.1 Price alert criteria along with real-time streaming quotes of the stocks

(b) How to use:

- i. Enter stock codes in the Stock ID input box to select the required stock.
- ii. Enter values into the input boxes of Above/Below, \$Up/\$Down, %Up/%Down, Bid/Ask, Volume and Last Transaction Volume to set the alerts.
- iii. Tick the radio button to select the sound settings at the bottom of the window.

Alert Tips:

Above – trigger an alert if the price goes up above this value

Below – trigger an alert if the price goes down below this value

\$Up/\$Down– trigger an alert if the price goes up/goes down more than this dollar amount
(based on previous day close)

%Up/%Down - trigger an alert if the price goes up/goes down more than this percentage
(based on previous day close)

Bid – trigger an alert if the bid price falls below or equals the input of the value

Ask – trigger an alert if the ask price goes up above or equals the input of the value

Volume – trigger an alert if the daily trading volume exceeds this amount

Last Transaction – trigger an alert if the trading volume of the last transaction exceeds or equals this amount

17. SEHK Page

17.1 Financial Information Pages

(a) Selecting from the pull down menu that shows the description of the information pages one by one. Or entering the page code directly in the text box to view one of the information pages.

The screenshot shows the AAStocks.com website interface. At the top, there are market indices: HSI (8847.74, -0.16%), HSCEI (2070.76, +0.16%), and HSIF (8733, Discon't 115). Below this is a table of financial information pages. The table has columns for CLASS, STOCK, STOCK NAME, PAGE NO., CLASS, and ST. 23. FAQ

23.1 Login Error

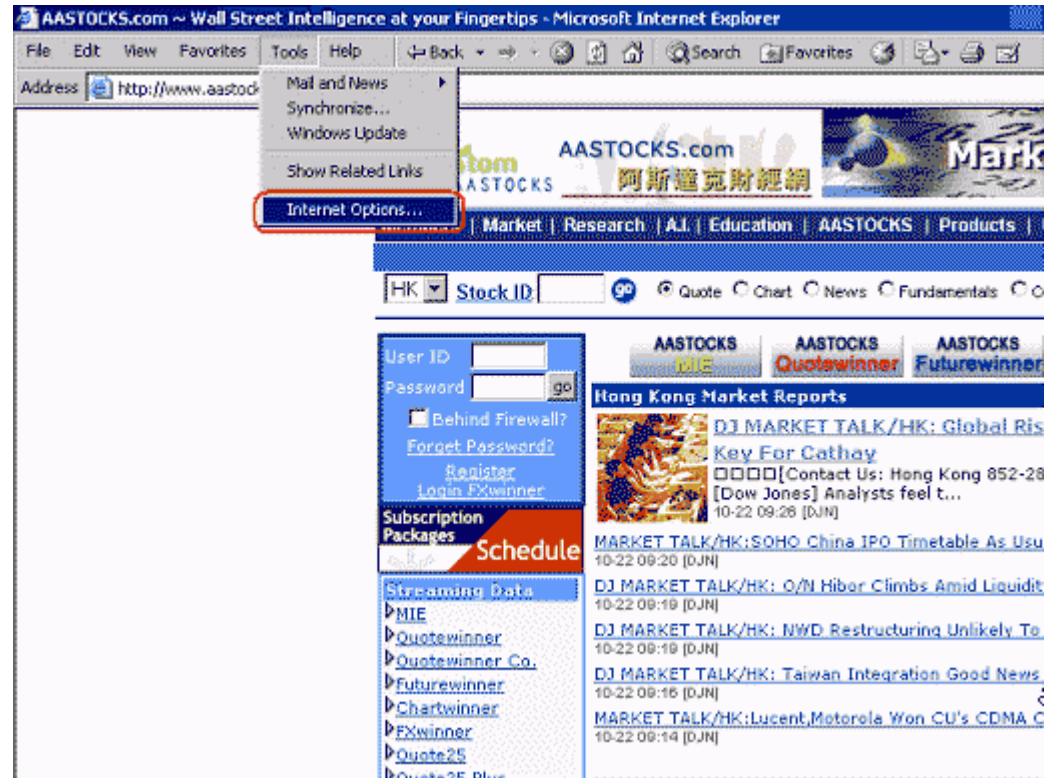

Q23.1.1) Login Error: It displays an error message of "The page cannot be displayed".

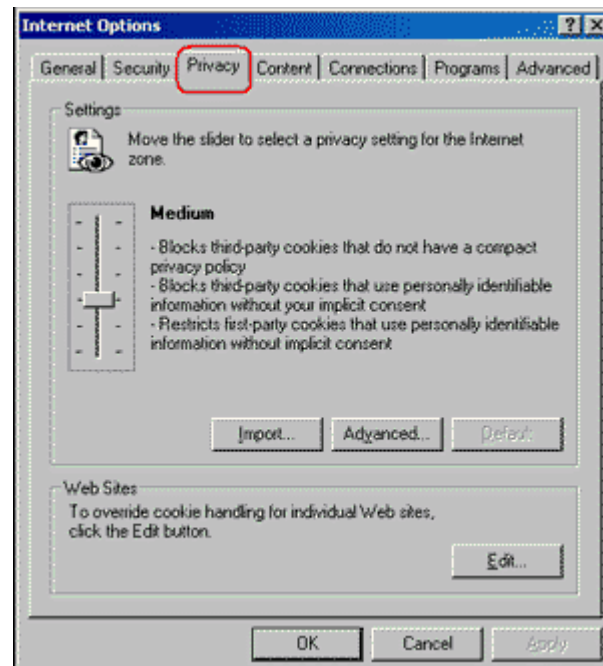

Ans:

This is because the function of cookies is not allowed on your system. You can follow these steps to enable the cookies function.

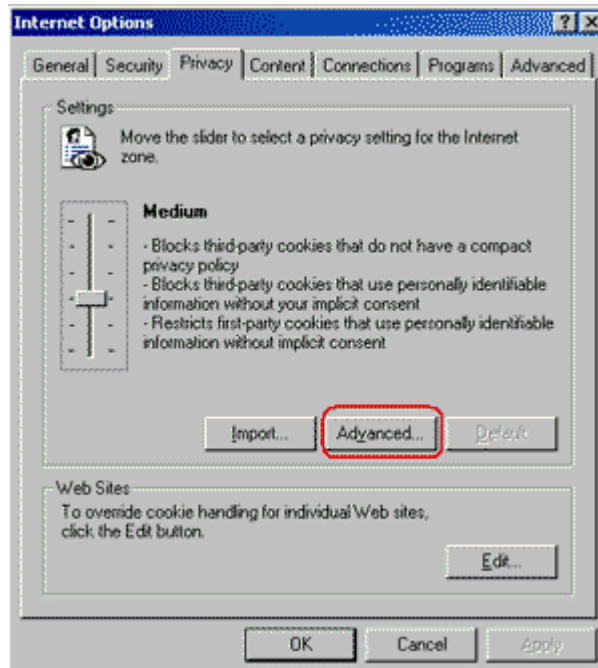

Step 1: Reach Internet Option in Internet Explorer.

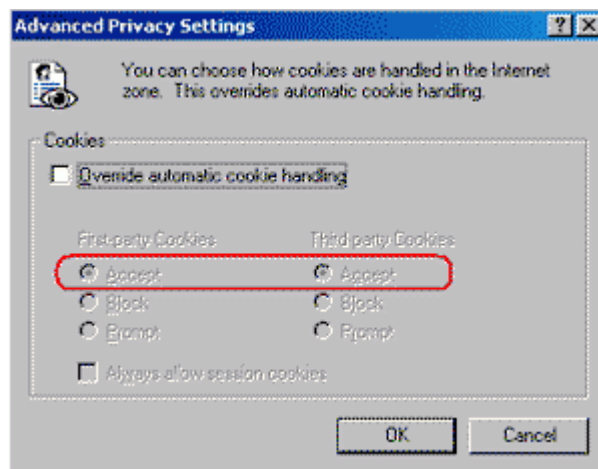

Step 2: Please go to Privacy section.

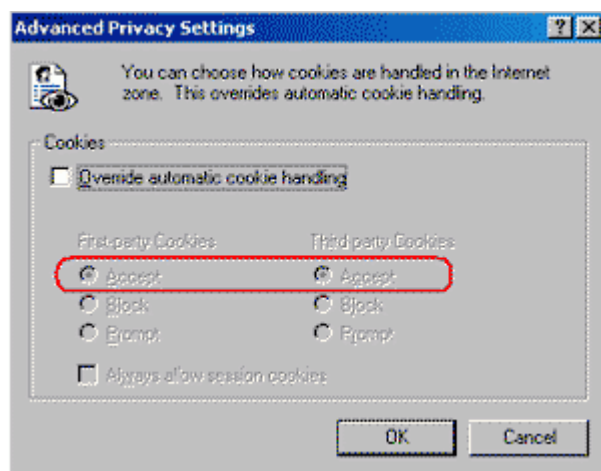

Step 3: Press the "Advanced" button.

Step 4: Choose "Accept" in the fields of Cookies.

Step 5: Click OK, then confirm the changes of the settings.

23.2 Firewall Protection

Q23.2.1) The Browser displays in gray color after login process. Are you protected by firewall?

Ans:

2.1) For computers behind a firewall or proxy server, TCP/UDP outgoing ports 8044 and 443 must be open, given that the user's computer can make socket connection to our servers via the proxy server. If you have any questions about the setting, please contact our Customer Service Hotline at (852) 2186 8685 or e-mail us at support@astocks.com.

Q23.2.2) Are the files being corrupted?

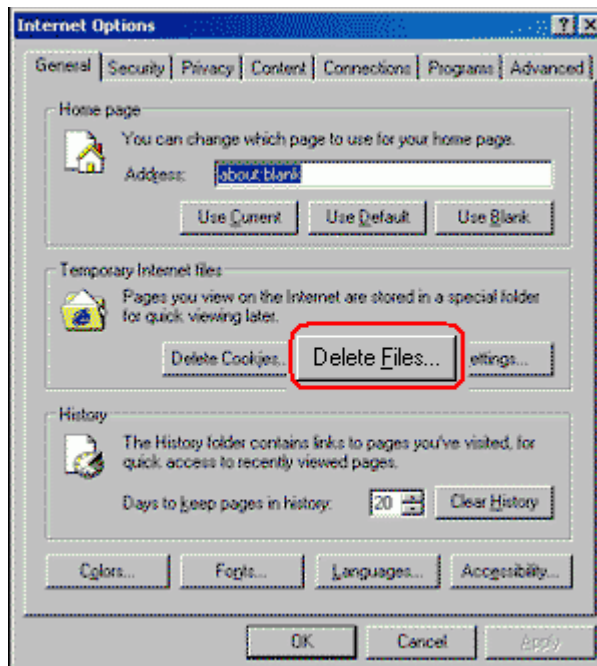

Ans:

23.2.2) Please follow the steps to clear the corrupted files and the program will reload the files again.

Step 1: Reach Internet Option in Internet Explorer.

Step 2: Delete the Temporary Internet Files.

Step 3: Click the button "OK" in the bottom of the Internet Option. And the corrupted files will be cleared.

Q23.2.3) Files in VM may be crashed.

Ans:

23.2.3) Please reinstall the Microsoft Virtual Machine.

You may download it here: <http://203.161.240.163/vmdownload/msjavx86.exe>

23.3 Wrong Encoding

Q23.3.1) Encoding language is not correct.

Ans:

23.3.1) Please right click your mouse in the area of the blank page then change the encoding to Chinese (Big 5).

24. System Requirements

24.1 Hardware

Quote Winner requires a computer with a 200MHz or better CPU running Window 98 or later. You will need a minimum of 64MB RAM (32MB Free) and at least a 50MB free hard disk space.

24.2 Software

Quote Winner also requires to run on Internet Explorer 5.0 or later with Java supported.

24.3 Network

Quote Winner will need an Internet access with modem 56 kbps or above, broadband cable or lease wire line.

In addition, if you need to print graphs from the Quote Winner, you will need a printer.
